Viajet Ozone

New features! Built-in ozone generator. Digital controls for greater reliability. Illuminated electronic panel displays current settings. New, positive locking system totally prevents any reservoir leaks. Comes with 3 standard and 4 specialty tips to clean everything in the mouth... teeth, gums, periodontal pockets, tongue and braces. An optional cannula attachment is available for pockets deeper than 4 mm.

Viajet Ozone Item # 3800	1-7 8-15 16-47 48+	$77.95 ea. $74.95 ea. $72.95 ea. $67.95 ea.

Internal tip storage with 3 standard tips & 4 specialty tips:

- **Standard Jet Tip:** Maximum power to blast away food particles and bacteria.
- Plaque Brush Tip: Soft mini-brushes help scrub away plaque while irrigating.
- **Orthodontic Tip:** Shorter, stiffer bristles help clean braces and brackets.
- Soft Periodontal Tip: For irrigating tender periodontal pockets.
- **Tongue Scraper:** For cleaning the tongue and preventing bad breath.

Ozone Features:

Built-In Ozone Generator 0.05-1.60 ppm

Dual choice push button irrigate with plain or ozonated water

Illuminated LED Control Panel

10 Power Settings

Snap Lock, Leak Proof, 600 ML Reservoir

Optional Deep Pocket Irrigation Kit

The Viajet's Standard Tips can irrigate to a depth of 4mm below the gum line. To irrigate even deeper pockets, a different kind of tip called a Cannula (Can u la) is needed. Sold as an optional attachment together with a Viajet handle adapter. It comes with instructions.

Optional Adapter Kit Item # 3885	1-7 8-15 16+	$9.50 ea. $9.00 ea. $8.50 ea.

Replacement Tips Sold Separately - Colors May Vary

- **Standard Jet Tip:** Maximum power to blast away food particles and bacteria.

Standard Jet Tip Item # 3805	$2.99 ea.	3+ $2.66 ea.

- **Plaque Brush Tip:** Soft mini-brushes help scrub away plaque while irrigating.

Plaque Brush Item # 3806	$2.99 ea.	3+ $2.66 ea.

- **Orthodontic Tip:** Shorter, stiffer bristles help clean braces and brackets.

Orthodontic Tip Item # 3808	$2.99 ea.	3+ $2.66 ea.

- Soft Periodontal Tip: For irrigating tender periodontal pockets.

Soft Periodontal Tip Item # 3807	$2.99 ea.	3+ $2.66 ea.

- **Tongue Scraper:** For cleaning the tongue and preventing bad breath.

Tongue Scraper Item # 3809	$2.99 ea.	3+ $2.66 ea.

1. Viajet Anti-Siphon Valve
2. Roller Valve
3. Viajet Foot Pedal
4. Heated Autoclavable Handpiece
5. Viajet Handpiece Holder

1

2 3

4

5

1. Anti-Siphon Valve

This one-way valve is located on the back of the Viajet and helps make the irrigator OSHA compliant by preventing cross contamination between patients. Anti-siphon valves tend to wear out over time and may start to leak. It's easily replaced, however. Just unplug the hoses on either end and attach them to the replacement valve.

Item #2260	$9.00 ea.

3. Foot Pedal

Plug your Viajet Office Irrigator into our Foot Controller for hands-free power irrigation.

Item # 2270	$40.00 ea.

4. Heated Autoclavable Handpiece

For replacements or tray set-ups, autoclavable handpieces can be ordered separately.
They accept all styles of Luer Lok cannulae.

Item # 3225	1 - 5 6+	$10.00 ea.

5. Handpiece Holder

Should it ever break, the handpiece holder can be ordered separately.

Item # 2255	$5.00 ea.

BIOSCAN
VIDEO COMPONENTS

Available to purchase separately

- Hayear High-Resolution Video Camera
- Medical Grade, Ultra Hi-Res, Flat Panel Video Displays

OraTec
Anti-Infective Perio

www.OraTec.com

Hayear High-Resolution Video Camera

Item # 4725	Hayear Camera	$250.00 ea.

A chain is only as strong as its weakest link. Hayear's 34-megapixel image sensor, full HD microscope camera is a perfect match for the extraordinary resolution of the ZEISS AxioLab 5 microscope with an HDMI video resolution of 1920x1080 @ 60 fps. The high pixel, high frame rate produces a super sharp, silky smooth video stream that makes it easy to identify even the smallest spirochetes. It's also amazingly small, just 2.75" square and a mere 1.75" high and protected by a solid aluminum case. The camera is so small that the total height of the microscope and camera is short enough to fit on a countertop under overhanging wall cabinets.

It has a built-in MP4 video recorder and TF flashcard slot so you can record microflora videos and upload them to electronic patient records. The recorder is limited to 30 fps, but that's good enough for patient records. Comes with a DC power cord and adaptor, software disk, and remote control.

If you have an older Panasonic video camera, upgrading to this Hayear is easy. Just unscrew your old camera and screw in the new one.

Medical Grade, Ultra Hi-Res, Flat Panel Video Displays

Customers sometimes ask: "Can I use my hi-def TV or computer monitor instead?" The answer is yes, but the images won't be as sharp. Many Treponema species (spirochetes) are only 0.5 microns wide. When we tested Panasonic's best industrial monitors against Neovo's medical-grade monitors, the smallest spirochetes that were invisible on the Panasonic were clear and sharp on the Neovo. No wonder Neovo is the monitor of choice in medical specialties like radiology.

How big of a monitor do you need? Since the price differences between the sizes are small, you should get the largest flat screen possible. Bigger screens have a distinct psychological advantage; the bigger the picture, the bigger the patient motivation effect, and readability. These monitors are rugged & carefree. Unlike commercial monitors, Neovo monitors have a rugged, aluminum alloy case with a scratch-proof, crystal glass screen that can withstand cleaning and disinfectants. Neovo's are great multitaskers too. They have multiple types of input jacks so you can simultaneously connect computers, intra-oral cameras, or TV sources and display them all on the same screen, all in incredibly sharp detail.

Features

-Non-Scratch Screen: Optical crystal screen is 3X harder than conventional LCD's.
-Cleans with ordinary glass cleaner.
-NeoV Crystal Optic Filter: Superb color definition for maximum detail and sharp text.
-Ultra Bright: 7.3% brighter than conventional LCD's. Brightness = 500cd/m2
-High Contrast: Contrast Ratio = 400:1
-Auto Display: Automatically adjusts the electronics and picture for maximum clarity.
-Wide Viewing Angle & Glare Reduction: The widest, off-axis viewing angle of any flat display.
-Rugged Aluminum Alloy Case concealed in an elegant finish.
-Connects to Anything: Analog, Digital, S-Video and CVBS.
-On Screen Control Panel: Controls every aspect of display.
-16.7 million colors
-Wall mountable

Item #4660	Ultra-High Resolution Flat Color Monitor	19"	$780.00
Item #4665		22"	$825.00

www.OraTec.com

1

2

3

4

1. Slides

Did you know that all slides and cover glasses aren't the same? The optical index and thickness of OraTec glassware is specifically crafted for use with phase contrast microscopes. In addition to being pre-cleaned, sharp edges are polished smooth for safe handling. Slides are sold by the box (100 slides/box). Important: Never reuse slides! OSHA classifies used slides as contaminated sharps. Dispose accordingly.

Slides 3"x1"	1-4	$18.90 /bx
(100 Slides/bx)	5-9	$18.35 /bx
Item # 5010	10+	$18.00 /bx

2. Cover Glasses

OraTec cover glasses are thinner than standard glasses and made specifically for use with phase contrast illumination.
They're also treated to reduce sticking.

Cover Glass 22x22mm	1-2	$9.50 ea.
(120 per Box)	5-9	$9.00 ea.
Item # 5020	10+	$8.65 ea.

3. OraPrep (3oz bottle)

Periodontal pathogens are extraordinarily sensitive to pH. They're highly adapted to the specific pH of crevicular fluid. They die when exposed to the different pH of saliva, Normal Saline, or distilled water. OraPrep has the same pH as crevicular fluid to ensure that what you see on a slide truly represents the subgingival microflora living in the sulcus. Important! Never Use: Normal Saline: It's pH is higher than crevicular fluid. Microbes and WBC's dehydrate and die in seconds. Tap Water: The pH is too low. Worse, it's often chlorinated. Distilled Water: The worst possible choice. Causes instant lysis of most cells.

Item #	1-2	$9.25 ea.
5060	3+	$8.75 ea.

4. OraSeal (1oz bottle)

Viewing slides immediately tends to underestimate both the number and types of pathogens present. Ideally, slides should be viewed 15-20 minutes after mounting to see all the pathogens. OraSeal is a biocompatible polymer that seals the edges of the cover glass and dries in seconds. It prevents desiccation and keeps crevicular samples alive long enough for the bacteria to recover from the trauma of harvesting and mounting. In fact, sealed slides will remain active for hours and hours. OraSeal's brush-cap makes sealing slides as easy as painting fingernails.

Additional Benefits: Quality Control — Standardized appearance from slide to slide. Prevents the river-like streaming caused by evaporation at the edges of unsealed slides that complicate viewing.

Tip: To prevent thickening don't wipe the brush on the rim of the bottle. Rim residues can prevent a good seal leading to evaporation and thickening. FYI: There's no way to thin OraSeal if it thickens. It's a one-way chemical reaction.

Item #	1-2	$9.00 ea.
5090	3+	$8.60 ea.

MICROSCOPY SUPPLIES FOR YOUR PHASE CONTRAST SYSTEMS

1. Nikon Lens Tissues
2. Immersion Oil
3. Microscope Replacement Bulbs

1

2

3

1. Nikon Lens Tissues (50 sheets per box)

High quality microscopic objectives have a delicate optical coating that's easily damaged. Never clean lenses with facial tissue or cotton. Lint-free, Nikon Lens Cleaning Tissues are specially designed to clean coated microscopy optics.

Item #		
5110	1-2	$6.95 ea.
	3+	$6.65 ea.

2. Immersion Oil (For use with 100X objectives)

100X objectives are also known as oil-immersion lenses because they must be used with Immersion oil. At high magnifications, even the tiny air gap between the slide and the lens will distort the image. Resolve brand immersion oil bridges the air gap with an oil that has the same optical refraction index of the glassware for distortion-free viewing.

Immersion Oil (15cc) Item # 5045	1-2	$14.70 ea.
	3+	$14.00 ea.

3. Microscope Replacement Bulbs

ZEISS' latest AxioLab, solid state illumination system rarely burns out. We stock replacements should you ever need one as well as replacement bulbs for most of the previous generations of Nikon and Olympus microscopes that we've supplied over the years.

POWER POINTS

POWERPOINT PRESENTATIONS, POSTER & MANUAL

OraTec
Anti-Infective Perio
800-368-3529
www.OraTec.com

Available for purchase: the Bill Landers courses.

- Microscope Office Manual
- Anti-Infective Periodontal Therapy
- Two, 2-hour PowerPoint Courses
- Microbial Wall Poster
- Periodontal Microflora CD

Microscope Office Manual – Landers

Item # 6210 | Microscope Manual | $39.95 ea.

This is the manual that comes with all BioScan Video Microscopy Systems, but can be purchased separately. It contains a wealth of information on everything about using a phase contrast microscope for periodontal risk assessment including tips on how incorporate microscopy into an Anti-Infective Therapy program. Included: Flow charts, Professional and Home care programs, Systemic antibiotics, Chemotherapeutic agents, Delivery systems, Insurance codes, Informed consent forms, Patient newsletters and much more!

Anti-Infective Periodontal Therapy, Two, 2-hour PowerPoint Courses – Landers (2024)

Item # 6220 | Power Point Course | $59.95 ea.

Email with download containing two, 2-hour PowerPoint courses: Microbiological Risk Assessment & Anti-Infective Periodontal Therapy. These continually-updated courses are the ones used by Bill Landers when he lectures at dental societies and schools. Massively illustrated with dynamic animations and hundreds of literature citations with dozens of embedded videos of the periodontal microflora.

Partial contents:

- **Periodontal theories from 1890 to present**
- **Microbiological differences between periodontal health & disease**
- **How oral pathogens trigger inflammation**
- **Traditional vs. Microbiological Tests**
- **Treating Periodontal Disease as an Infection**
- **Local & Systemic Antimicrobial Agents**
- **Antimicrobial home care armamentarium**
- **Therapeutic targets**

Microbial Wall Poster

Item # 6200 | Microbial Wall Poster | $32.95 ea.

Microbial Wall Poster illustrating all the important pathogens. A patient favorite! A heavily laminated wall chart (easily washable) that
illustrates the "bugs" in plaque biofilms with a pie chart divided into risk categories (Moderate, High, & Healthy) with drawings of Spirochetes; Protozoans; RBC and WBC's. A must-have for any office that does microbiological risk assessment. It's a great visual aid
for helping patients understand which "bugs" are risky and which aren't.

Periodontal Microflora Download – Landers

Item # 6010 | Periodontal Microflora Download | $49.95 ea.

30 Minutes, Computer Download. The course begins with a step-by-step demonstration of the best technique to mount biofilm samples on slides. The balance of the CD is a video survey of the periodontal microflora. The video includes examples of all the major pathogenic morphotypes found in low, moderate, and high-risk biofilms, including some of the original historic videos of the microflora made by Dr. Paul H. Keyes, Senior Researcher, National Institute of Dental Research (NIH). Highlights: Treponema (Spirochetes); Protozoans (amoebae & trichomonads); Capnocytophaga; Motile, Spinning, Gliding, and Spiral rods; Candida (Yeast); RBC's and WBC's. It even has examples of non-bacterial artifacts that puzzle newbie biofilm viewers such as food particles and hair shafts.

Testing Antimicrobial Product Claims

Ever wonder if the antimicrobial claims made by products are true? With a microscope, you can test product claims for yourself. Here's how: Put a drop of OraPrep on one side of a slide. Put a drop of Product X on the opposite side. Divide a single subgingival plaque specimen into two portions, one into the OraPrep control and the other into Product X.

Place a separate cover glass over each sample and seal each with OraSeal. Wait 15 minutes and compare. The OraPrep sample is your control. If Product X is bactericidal, it should have far fewer bacteria with less activity than the control. If not… you might want to rethink your antimicrobial program.

😂 ***Tip: Don't leave unsupervised children or dentists alone with this microscope.*** 😂

OraTec is famous for its unstinting support. We pioneered chair-side microbiological testing.

THERASOLRINSE

ANTIMICROBIAL MOUTHWASH/IRRIGANT

- Highly effective, professional strength mouthwash
- Wonderful minty taste
- No harsh burning sensation or tooth staining
- Squeaky-clean teeth
- No “Morning Breath”
- Helps prevent tartar build-up

OraTec
Anti-Infective Perio
800-368-3529
www.OraTec.com

TheraSol Ready to Use (RTU premixed)

TheraSol is a strong, professional-strength mouthwash and oral irrigant. Despite it’s strength, it doesn’t burn or stain the teeth and tastes great with the flavors of Spearmint, Peppermint and Menthol. You’ll love the sparkling, squeaky-clean feel of your teeth afterwards. Use it before bed to totally prevent nasty “Morning Breath”. TheraSol is also highly substantive. That means that it clings to surfaces for over 6 hours, continuing to work long after it’s used. It also helps prevent the buildup of tartar on the teeth.

RTU 4 Oz. Btls.	Qty. 1+	$3.25 ea.
Item # 1125 ea.	Qty. 1 - 3	12/$33.00 cs.
Item # 1120 cs.	Qty. 4+	12/$30.00 cs.
(12 btls. per cs.)		

RTU 16 Oz. Btls.	Qty. 1+	$8.75 ea.
Item # 1115 ea.	Qty. 1 - 3	12/$79.00 cs.
Item # 1110 cs.	Qty. 4 - 7	12/$75.00 cs.
(12 btls. per cs.)	Qty. 8 - 11	12/$72.00 cs.
	Qty. 12+	12/$68.00 cs.

RTU 64 Oz. Btls.	Qty. 1+	$28.50 ea.
Item # 1145 ea.	Qty. 1 - 2	4/$91.00 cs.
Item # 1140 cs.	Qty. 3 - 5	4/$87.00 cs.
(4 btls. per cs.)	Qty. 6 - 11	4/$83.00 cs.
	Qty. 12+	4/$79.00 cs.

TheraSol w/Xylitol
(RTU premixed only available in 16 oz. Bottles)

Like Xylitol? TheraSol is also available with Xylitol. It costs a bit more than regular TheraSol that’s sweetened with non-nutritive saccharin because Xylitol costs more. It isn’t nearly as sweet either, so it requires more xylitol. A lot more. While it only takes 0.05 ounces of saccharin to sweeten 1,000 gallons, it takes 840 pounds of Xylitol!

RTU Xylitol	Qty. 1+	$11.75 ea.
16 Oz. Btls.	Qty. 1 - 3	12/$101.00 cs.
Item # 1135 ea.	Qty. 4 - 7	12/$97.00 cs.
Item # 1130 cs.	Qty. 8 - 11	12/$93.00 cs.
(12 btls. per cs.)	Qty. 12+	12/$88.00 cs.

TheraSol Concentrate
(Makes 5-9 bottles of ready-to-use)

TheraSol Concentrate is very economical when mixed with ordinary tap water. One bottle of Concentrate will make the equivalent of 5-9 (16 oz.) bottles of premixed TheraSol. The savings are a whopping 26%-45%. For easy measuring and storage see page 11.

Concentrate	Qty. 1+	$24.00 ea.
16 Oz. Btls.	Qty. 1 - 3	12/$218.00 cs.

Mixing Bottles & Pump

The TheraSol 1,000 ml. Mixing/Storage Bottle makes it easy to measure, mix and store the Concentrate as Ready-To-Use TheraSol for daily use. The bottle's measuring lines are molded in plastic so they can never peel or wash off. The mixing instructions are also printed on the bottle. The measuring lines, wide opening and crystal-clear bottle material make mixing simple, easy, and fast. A smaller, 500 ml. (17 oz.) bottle is also available. The square shape makes it harder to tip over than round bottles and stores better in cabinets.

500 ml. Mixing Bottle Item # 1070	$7.00 ea.
1000 ml. Mixing Bottle Item # 1075	$12.75 ea.
Dispensing Pump Item # 1065 (only fits 64 oz. bottle)	$4.00 ea.

TheraSol Tartar Dissolver 3 oz. Bottle

Removes tartar buildup, highly concentrated powder with measuring scoop. Gum Treatment just got easy! Dissolve Tartar and Improve your Perio. Recommended for Gingivitis and Bleeding Gums. TheraSol Tartar Dissolver is a highly concentrated powder. Dilute with ordinary tap water or TheraSol before using. For moderate tartar (calculus), mix 1 scoop (provided) in ½ cup of warm water or TheraSol. Two scoops for heavy calculus. Swish vigorously for 2 minutes, 2x/day. For even better results, dip your toothbrush in the diluted solution and brush your teeth with it 2x/day.

Mix Tartar Dissolver in TheraSol for even better biofilm & tartar control.
How to Mix: Add 2 scoops Tartar Dissolver to 1 bottle of Ready-to-Use TheraSol

Item # 1055 Regular Item # 1056 Mint	1 - 2 12-49 50+	$20.95 ea. $17.95 ea. $15.95 ea.

POCKET CARE

DEEP POCKET IRRIGATION

Portable Irrigator 1/2 oz.

2 Tip Styles:

- Twin Side-Port - Sprays sideways for better delivery. Rounded end is more comfortable to insert.
- End-Port - Slightly cheaper, but less comfortable.

End Port

Twin Side-Port

OraTec
Anti-Infective Perio
800-368-3529
www.OraTec.com

Deep Pocket Irrigator for Home Care

Pocket Care is designed to deliver antimicrobial agents to the full depth of even the deepest periodontal pockets.

Pocket Care is one of our most popular products for patients with deep periodontal pockets. That's because, other than the Cannula Adaptor Kit for the Viajet, nothing else can deliver antimicrobial agents deeper than 4 mm. It's easy to use too. Just insert the tip into a pocket until some resistance is felt and squeeze.

Some clinicians say they are afraid patients might hurt themselves. We used to worry about that too, but patients have been using Pocket Care since the 1980s and there's never been even a single report of a patient injury. As clinicians, we forget that patients don't have to rely on tactile dexterity to tell if they're nearing the base of a pocket. They can feel it.

Features

- The 1/2 oz. Pocket Care comes in two styles: Twin Side Port & End Port.
- The Twin Side Port comes in two sizes (21 & 24 gauge). It has a closed round end with two side ports 1 & 2 mm from the distal end. The round end slides smoothly into pockets without snagging tissue and the distal side ports ensure the solution is delivered to the base of the pocket where the most anaerobic pathogens thrive.
- The End Port comes in three sizes (21, 24 & 27 gauge). Fluids exit through a port at the very end of the tip.
- The 24 gauge is by far the most popular size. The larger 21 gauge is great for irrigating large pockets. The 27 gauge is used when pockets are too narrow to insert a 24 gauge.
- Best used with water-soluble antimicrobial agents like TheraSol. Not recommended for use with essential oils, especially those packaged in glass bottles. They tend to eat through plastics.

The Pocket Care is available in several sizes and tip styles.

Item #	Description	Qty	Price Bx/12	Qty	Price Bx/12	Qty	Price Bx/12

IRRIGATION CANNULAE

DISPOSABLE IRRIGATION NEEDLES

OraTec
Anti-Infective Perio
800-368-3529
www.OraTec.com

1. Cannulae are single-use, disposable blunt needles
2. Cannulae size come in different "Gauges" (g)
3. Metal irrigation cannulae in several styles
4. Not intended for reuse. They cannot be sterilized.

OraProbe™

Cannulae are single-use, disposable blunt needles designed to deliver antimicrobial agents to the apical third of periodontal pockets. OraTec manufactures three different types of cannulae in a wide range of sizes. All OraProbe™ cannulae have easy-to-use, plastic, Luer Lok mounting hubs.

Never reuse cannulae

They cannot be sterilized, even by autoclaving. The lumen is just too small for steam to penetrate. Cannulae should be treated as contaminated sharps for disposal.

1. Twin Side Port

Our most popular design! Solid round end slides more smoothly into pockets than the end-port design. Double ports thoroughly flood the pocket with irrigant.

Item #	Twin Side Port	1-2 ea. bx.	3-5 ea. bx.	6+ ea. bx.
2810	21g Twin-Side-Port - Box of 100	$99.00	$94.00	$89.00
2820	24g Twin-Side-Port - Box of 100	$99.00	$94.00	$89.00
2830	27g Twin-Side-Port - Box of 100	$99.00	$94.00	$89.00
2870	24g Twin-Side-Port PIC 3.6.9- Box of 100	$99.00	$94.00	$89.00
2880	24g Twin-Side-Port ENDO - Box of 100	$99.00	$94.00	$89.00
2890	27g Twin-Side-Port ENDO - Box of 100	$99.00	$94.00	$89.00

2. Single Side Port

2nd most popular design. Identical to the Twin Side Port, but with a single port 1mm from the tip instead of two.

Item #	Single Side Port	1-2 ea. bx.	3-5 ea. bx.	6+ ea. bx.
2800	24g Single-Side-Port - Box of 100	$99.00	$94.00	$89.00
2807	25g Single-Side-Port - Box of 100	$99.00	$94.00	$89.00

3. End Port

Fluids exit straight from the tip. Cheaper than side-ports but doesn't enter the pockets as smoothly or flood as thoroughly. Also doesn't flood pockets as thoroughly.

Item #	End Port	1-2 ea. bx.	3-5 ea. bx.	6+ ea. bx.
2840	OraProbe 21g End-Port OraProbe - Box of 100	$74.00	$70.00	$66.00
2850	OraProbe 24g End-Port OraProbe - Box of 100	$74.00	$70.00	$66.00
2760	23g-End-Port Monoject - Box of 100	$74.00	$70.00	$66.00

4. Sample Pack

PerioBrite Mouthwash

Nature's Answer PerioBrite Natural Mouthwash is a dentist-formulated, fluoride- and alcohol-free rinse that supports gum health and fresh breath. With soothing herbs, CoQ10, and botanicals, it helps moisturize tissue and fight odor with a refreshing mint feel.

Item # 1520 $10.99 ea.

PerioBrite Cleanse

Nature's Answer PerioBrite Cleanse is a natural, dentist-formulated concentrate for deep cleaning hard-to-reach areas. Made with soothing herbs, essential oils, and Phytoplenolin, it supports oral health and cell vitality. Fluoride-, alcohol-, and preservative-free with a refreshing mint taste—ideal for oral irrigators.

Item # 1530 $23.95 ea.

PerioBrite Topical Rub

Nature's Answer PerioBriteRub is a dentist-formulated gel for periodontal health, delivering fast comfort while supporting teeth and gums. With Phytoplenolin, soothing herbs, CoQ10, and botanicals, it promotes tissue wellness and leaves a refreshing minty feel—gentle enough for sensitive teeth.

Item # 1540 $7.99 ea.

PerioBrite Breath Freshener

Say goodbye to bad breath with our easy-to-use breath freshener spray! Essential for overall health, it offers quick freshness without the awkwardness of chewing gum. With ingredients like Phytoplenolin, Bio-Saponins, Xylitol, peppermint, and cinnamon, it promotes optimal oral health. Compact, effective, and alcohol-free, it's perfect for maintaining fresh breath on the go.

Item # 1545 $9.99 ea.

PerioBrite Toothpaste Cool Mint with Xylitol

Dentist-formulated PerioBrite Brightening Toothpaste features Phytoplenolin®, a patented extract that supports cell vitality, plus soothing herbs, CoQ10, and botanicals to promote gum health.

Item # 1535 $8.95 ea.
12-35 $6.75 ea.
36+ $6.50 ea.

PerioBrite Toothpaste Activated Charcoal

PerioBrite® Activated Charcoal Toothpaste is a fluoride-free whitening toothpaste made with coconut charcoal and Bactase™ oral enzymes to help remove surface stains, break down impurities, and support healthy teeth and gums.

Item # 1535 $8.50 ea.
12-35 $8.00 ea.
36+ $7.75 ea.

Tongue Cleaner

Our new stainless steel model features double rows of ridges for deeper, more effective cleaning. The larger handle offers better grip, and the durable metal design is easy to clean—even dishwasher safe. Try it and feel the difference.

Item # 2992 $8.99
Pack of

Perio Toothbrush

The Perio Toothbrush offers unmatched cleaning, with ultra-soft bristles that minimize abrasion while effectively massaging and cleaning teeth. It lasts at least 50% longer than standard nylon bristles, making it ideal for those with braces and sensitive gums.

Item # 2990 1-11 $3.25 ea.
12+ $2.95
